

# **THE FUNDAMENTALS OF MEDICAL TERMINOLOGY**

**By**

**Dr/Aisha Abdelnaser**

**Lecture of Obstetrics & Gynecology**

# MISCELLANEOUS SUFFIXES

| Examples                                                                          | Meaning             | SUFFIXES                                       |
|-----------------------------------------------------------------------------------|---------------------|------------------------------------------------|
| -injectable, edible                                                               | capable of, able to | -able, -ible                                   |
| iliac, dermal, median, ulnar, capil- lary, meningeal, hepatic, invasive, cyanotic | pertaining to       | ac, -al, -an, -ar, -ary, -eal, -ic, -ive, -tic |
| peritoneum, myocardium                                                            | Membrane            | -eum, -ium                                     |
| paranoia, dwarfism                                                                | condition or theory | -ia, -ism                                      |
| Fructose                                                                          | Sugar               | ose                                            |
| -Cancerou                                                                         | characterized by    | ous                                            |

# MISCELLANEOUS WORD PARTS

| Word Association        | Meaning | Word Part     |
|-------------------------|---------|---------------|
| adipose, hyperlipidemia | fat     | adip/o, lip/o |
| Hyperglycemia           | sugar   | glyc/o        |
| Hematology              | blood   | hemat/o       |
| Lactation               | milk    | lact/o        |
| microscopy              | small   | Micro         |
| Mucous                  | mucus   | muc/o         |

# NUMBERS AND QUANTITIES

| Word Association                                         | Example                    | Meaning | Prefix         |
|----------------------------------------------------------|----------------------------|---------|----------------|
| Mononuclear “one nucleus cell”.<br>Unilateral “one side” | mononuclear,<br>unilateral | one     | mono-,<br>uni- |
| Bicuspid valves of the heart<br>Dizygotic twins          | bicuspid,<br>disaccharide  | two     | bi-, di-       |
| Tricuspid valve of the heart                             | tricuspid                  | three   | tri-           |

| Word Association                              | Example       | Meaning                           | Prefix                      |
|-----------------------------------------------|---------------|-----------------------------------|-----------------------------|
| Quadriplegia “paralysis of extremities        | quadriplegia  | four                              | quad-,<br>quadri-<br>,tetra |
| Centigrade                                    | centigrade    | one<br>hundred                    | centi-                      |
| A milliunit is 1/1000 of a unit.              | Milli unit    | one<br>thousandth                 | milli                       |
| Hyperglycemia<br>is excessive blood<br>sugar. | hyperglycemia | excessive,<br>more than<br>normal | hyper                       |

| Word Association                                                                                                                                                                                                     | Example                       | Meaning                       | Prefix          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|-------------------------------|-----------------|
| <p>Hemiparesis refers to weakness of one entire side of the body.</p> <p>Semi-fowler's position is a position assumed when a client is supine on a bed with the head of the bed elevated at about 30–45 degrees.</p> | hemiparesis,<br>semi-fowler's | half, partly                  | hemi-,<br>semi- |
| <p>Decreased blood sugar in the blood is known as hypoglycemia.</p>                                                                                                                                                  | hypoglycemia                  | under, less<br>than<br>normal | hypo            |

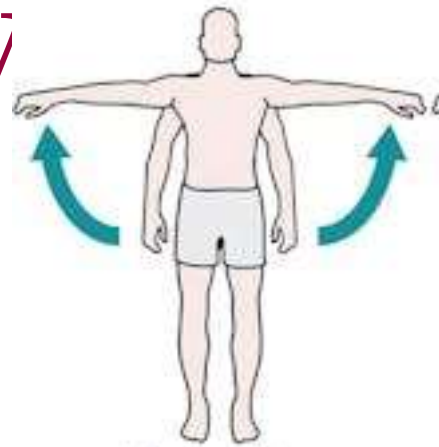

| Word Association                                                                                              | Example                  | Meaning             | Prefix           |
|---------------------------------------------------------------------------------------------------------------|--------------------------|---------------------|------------------|
| <p>Multigravida; more than one pregnancy.</p> <p>Polyuria; Increased production and passage of urine</p>      | multigravid,<br>polyuria | many                | multi-,<br>poly- |
| <p>A woman who hasn't given birth is referred to as nulliparous.</p>                                          | nulliparous              | none                | nulli-           |
| <p>Primigravida “ woman in first pregnancy</p>                                                                | primigravida             | first               | primi-           |
| <p>Superior vena cava is a large diameter blood vesselthat drains blood from the upper parts of the body.</p> | superior,<br>ultrasound  | excessive,<br>above | super-,<br>ultra |

# ***POSITION OR DIRECTION***

***ab***

Abduction is movement of a body Part away from the midline.

***away from***

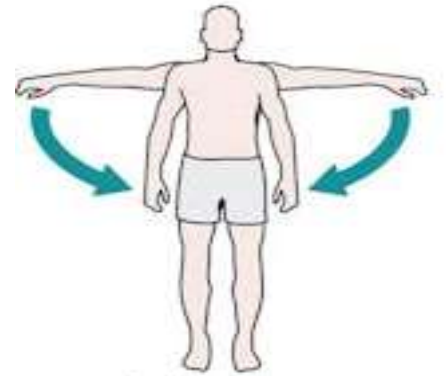

Abduction

***ad-***

Adduction is movement of a body part toward the midline.

***toward***

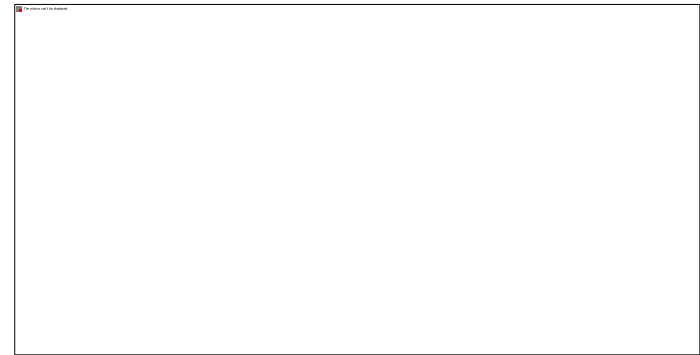

Adduction

***endo-***

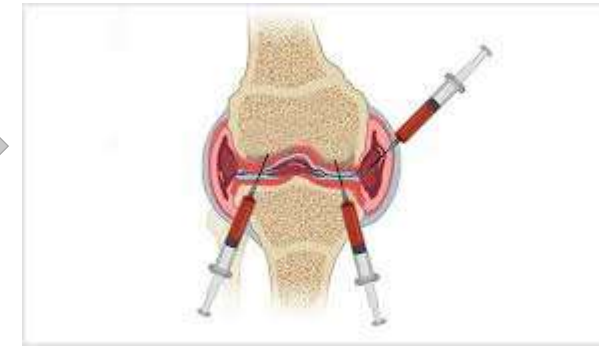

Endolymph is the fluid found within the membranous labyrinth of the ear.

***inside***

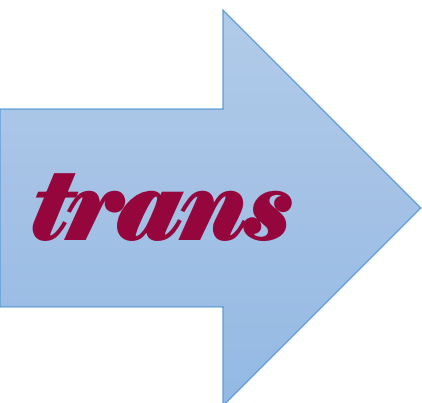

Intraosseous means  
within the bone.

Retrograde means  
going back in  
position or time.

Transference occurs when one's  
feelings are unconsciously  
redirected to another.

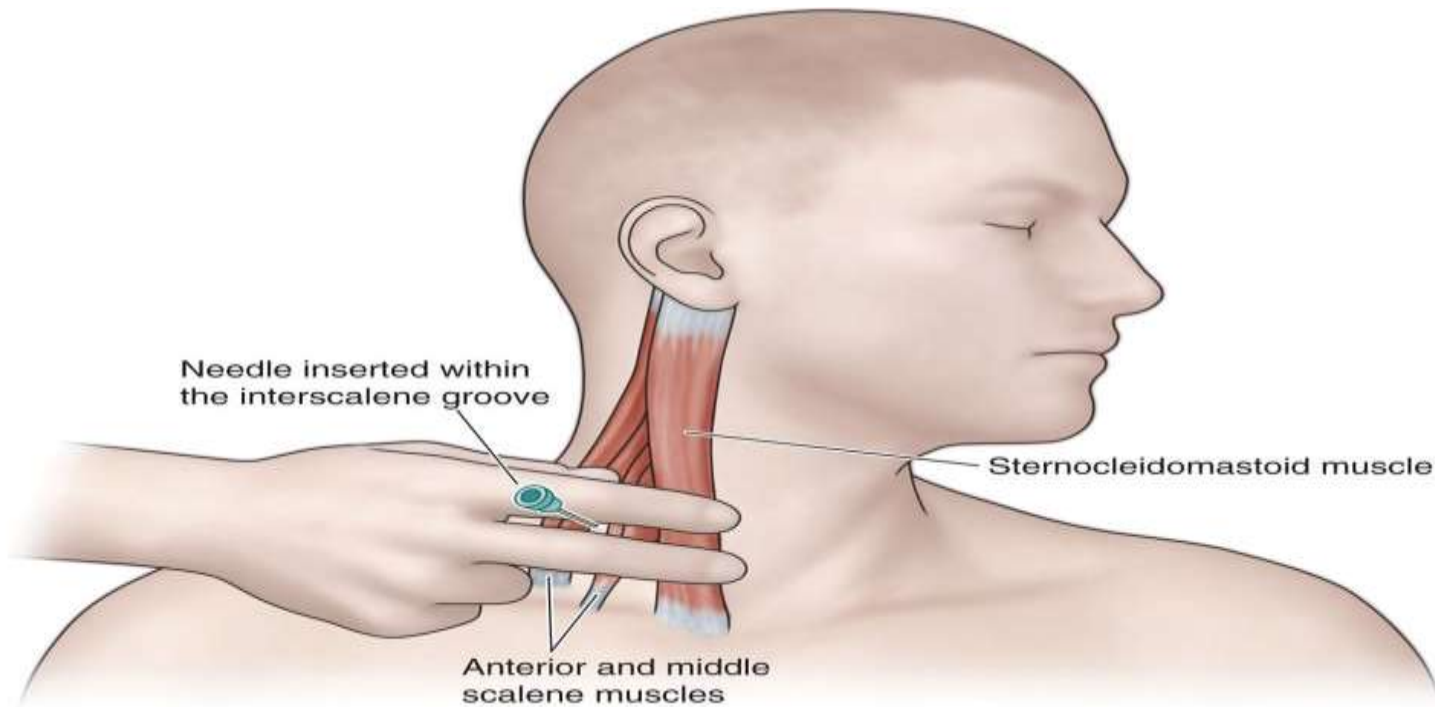

*super-,  
supra*

Superficial;  
near or on the surface.

*above,*

Supraclavicular; above the clavicle

# MISCELLANEOUS PREFIXES :

**brady** slow

---

- Bradypnea means decreased respiratory rate.

**dys-** bad, difficult

---

- Difficulty swallowing is referred to as dysphagia.

**mal-** Bad

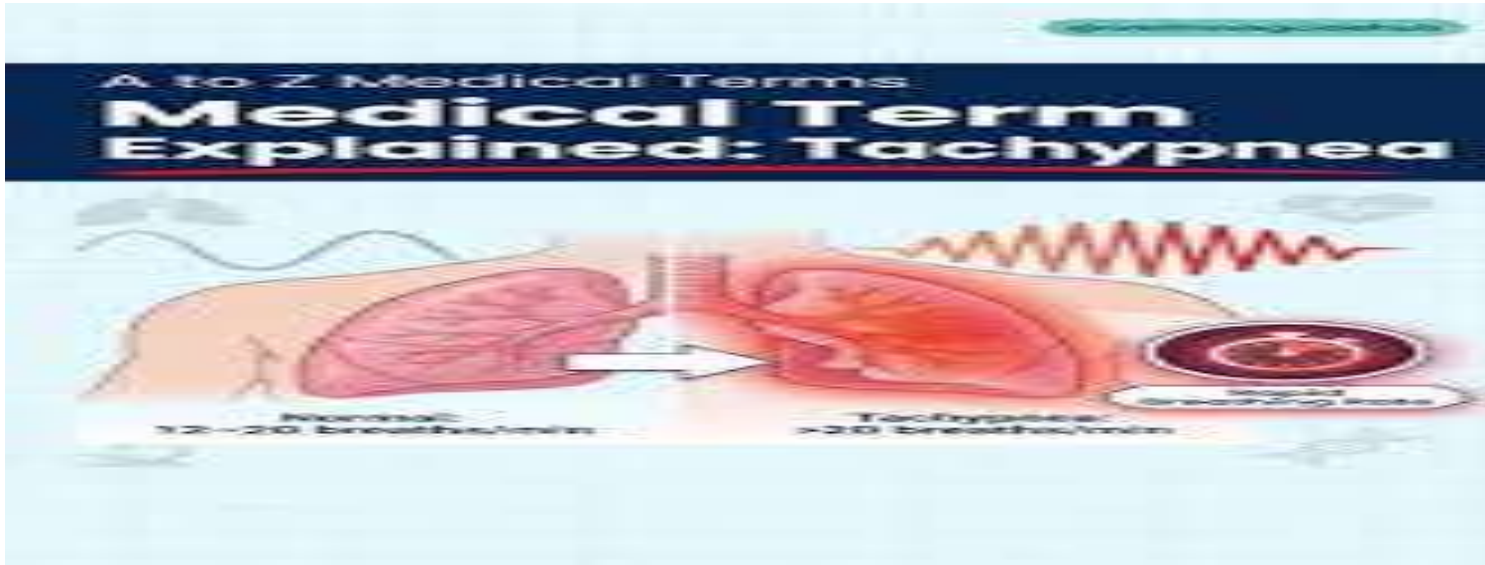

---

- Malabsorption; inability to properly absorb food & nutrients.

*Tachy-*

Tachypnea; fast respirations.

*Fast*

*a-,*

Apathy; absence of emotion.

*no, not,*

*an-*

Analgesia; absence of sensibility to pain.

*without*

# COMBINING FORMS FOR COLORS

alb/o, albin/o,  
leuk/o(leuc/o)

Leukocytes; white cells

**chlor/o**

**Chlorophyll;** green cells in the  
plants

**cyano/o**

**Cyanosis;** bluish discoloration

**erythr/o**

**Erythrocytes;** red blood cells

# COMBINING FORMS FOR COLORS

**melan/o**

**Melanin;** dark cells

**xanth/o**

**Xanthophobia;** is the  
fear of the yellow  
color.

# ***DIAGNOSES AND INTERVENTIONS***

**acceptable limit**

**Normal  
range**

**Symptoms**

**condition involving  
a disease  
process**

**Pathologic**

**subjective data; made by the  
client or significant others  
based on their perception.**

**Signs**

**Prognosis**

**Diagnosis**

**observable characteristics  
that have been gathered  
through the use of the senses  
As auscultates (listens) for  
breath sounds**

**anticipated outcome  
of a disease**

**naming a disease or condition  
based on scientific evaluation**

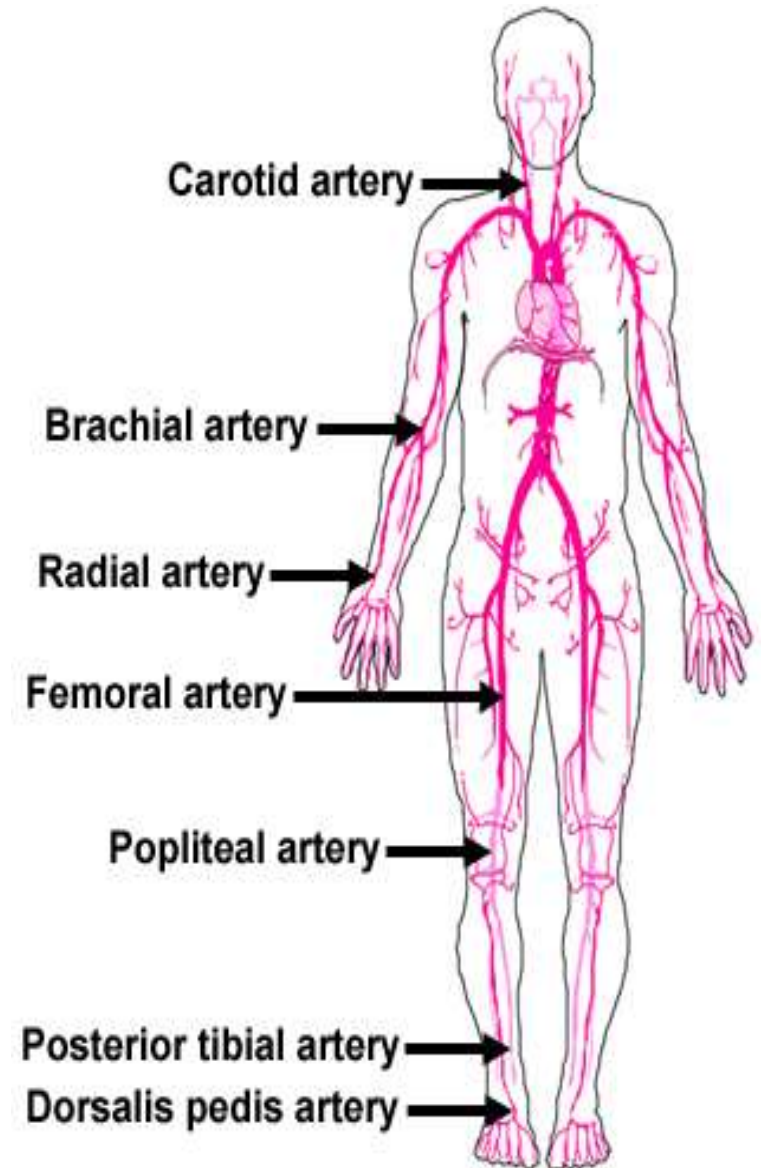

# BASIC EXAMINATION PROCEDURES *Vital signs*

**(P)**

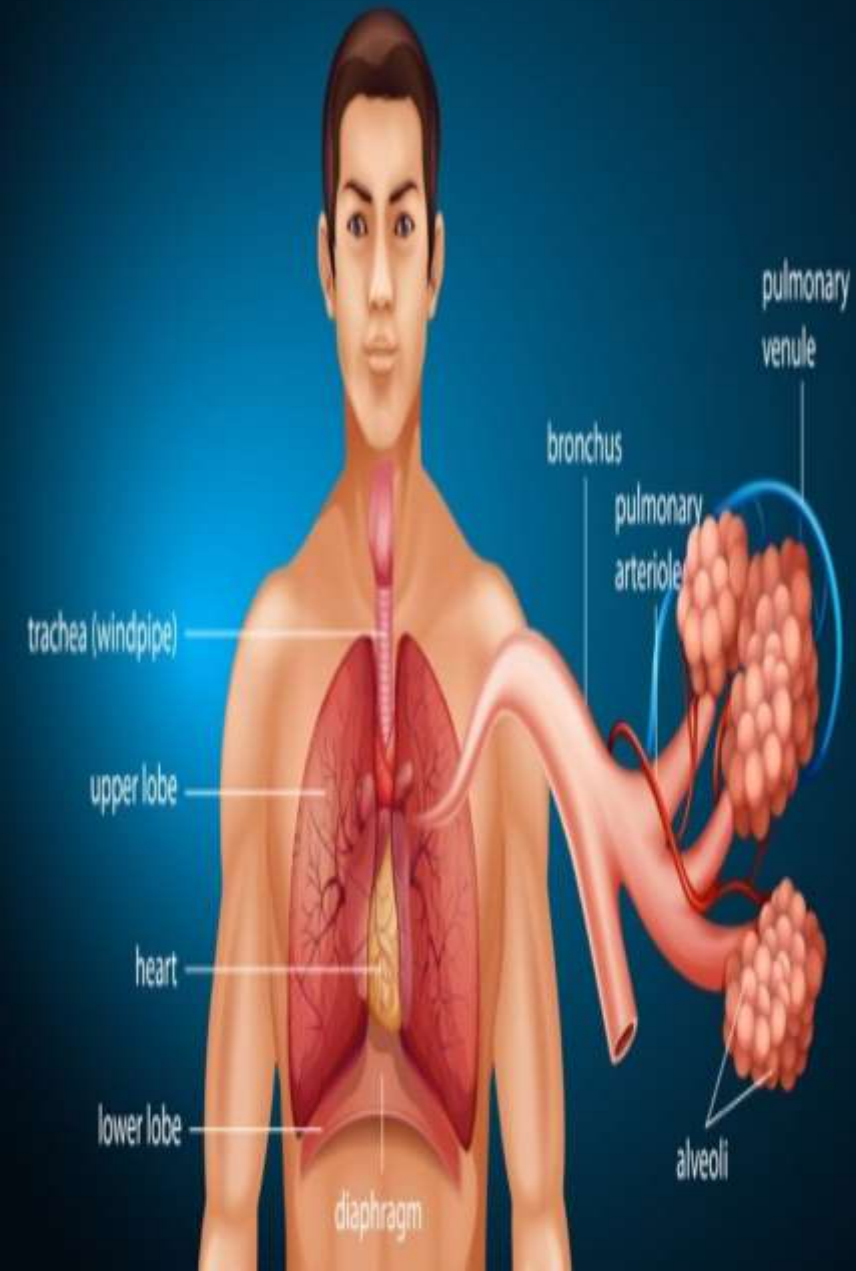

Expansion of an artery referred to as heart beats

**Pulse rate (PR):**  
is the number of heart beats per minute

Pulse

# Human Respiratory System

**( R )**  
**ventilation or breathing**  
Measured by counting the  
rise and fall of the  
chest during breathing

Respiration

- Balance between heat lost and heat produced by the body
- Measured in Centigrade and Fahrenheit.

# Temperature

Pressure of the circulating blood on the blood vessel

**mm Hg** (mercury) is the standard unit of measure

**Systolic:** maximum arterial pressure during contraction

**Diastolic:** pressure during relaxation.

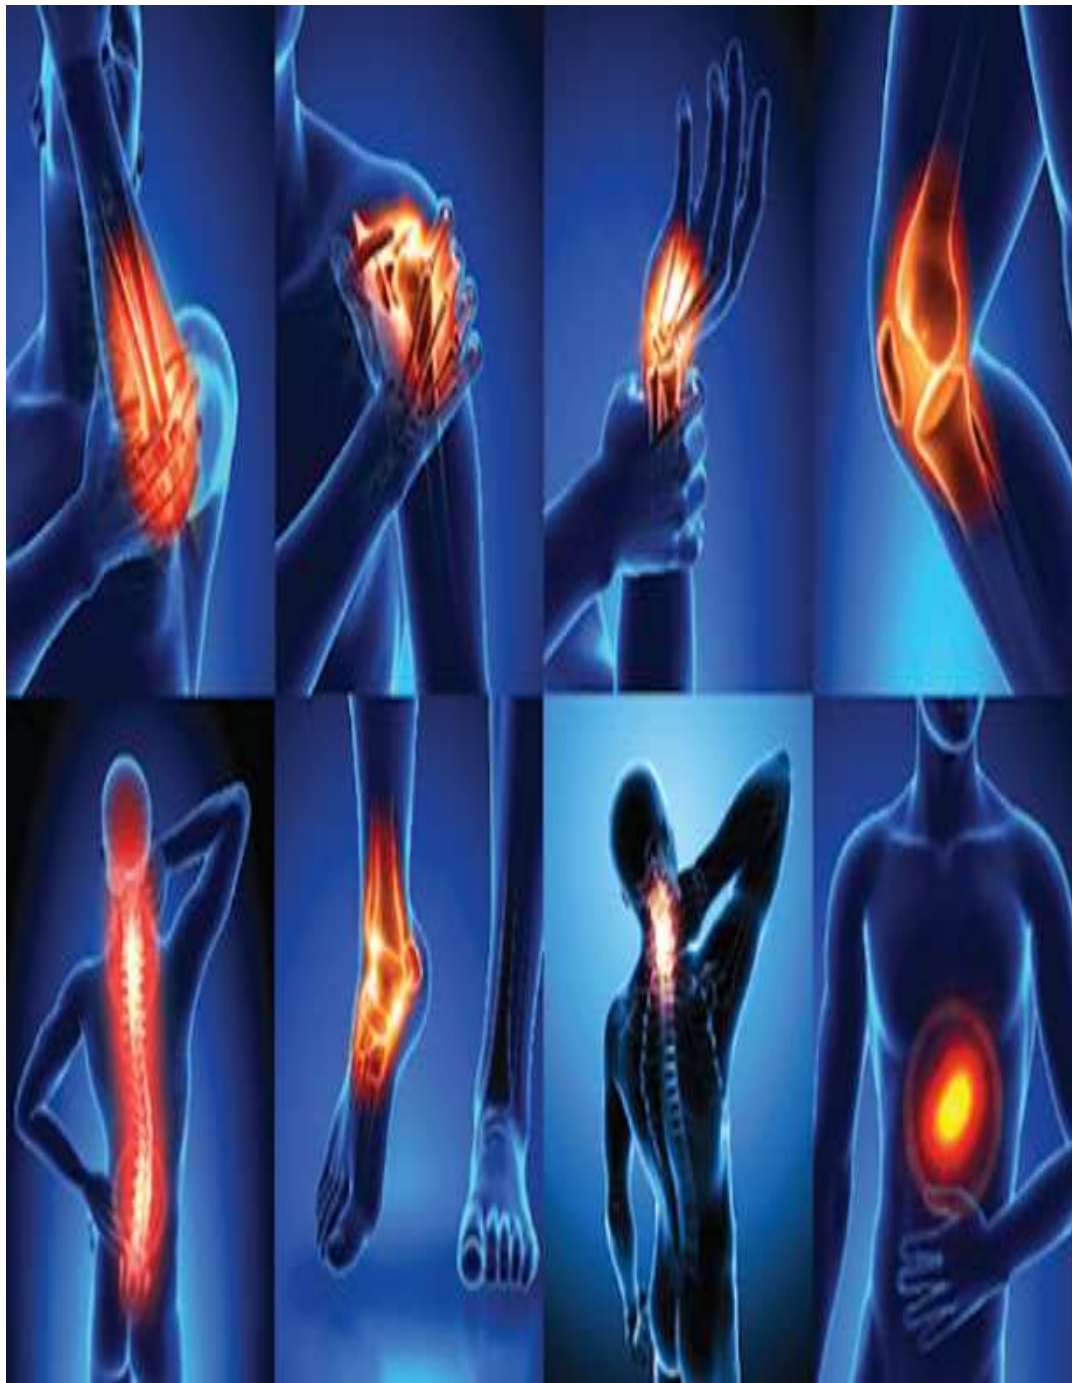

# Blood pressure

- Measure of the concentration of oxygen .
- Measured using a pulse oximeter.

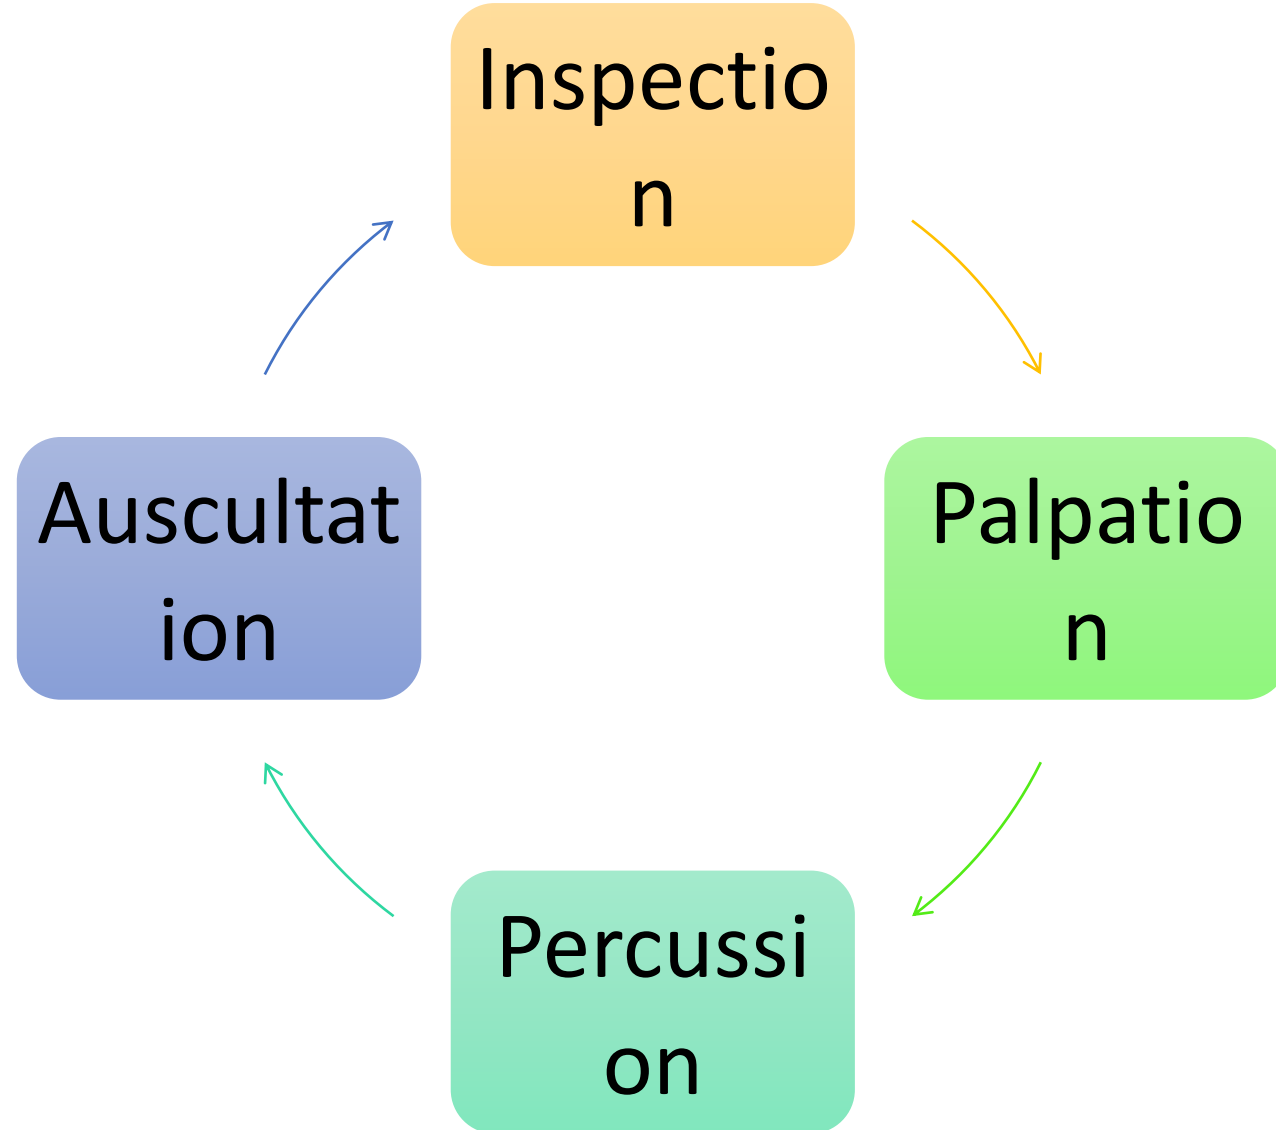

# Oxygen saturation

Pain

Unpleasant  
feeling  
caused by  
intense or  
damaging  
stimuli.

# Technique

*Inspection*

sight

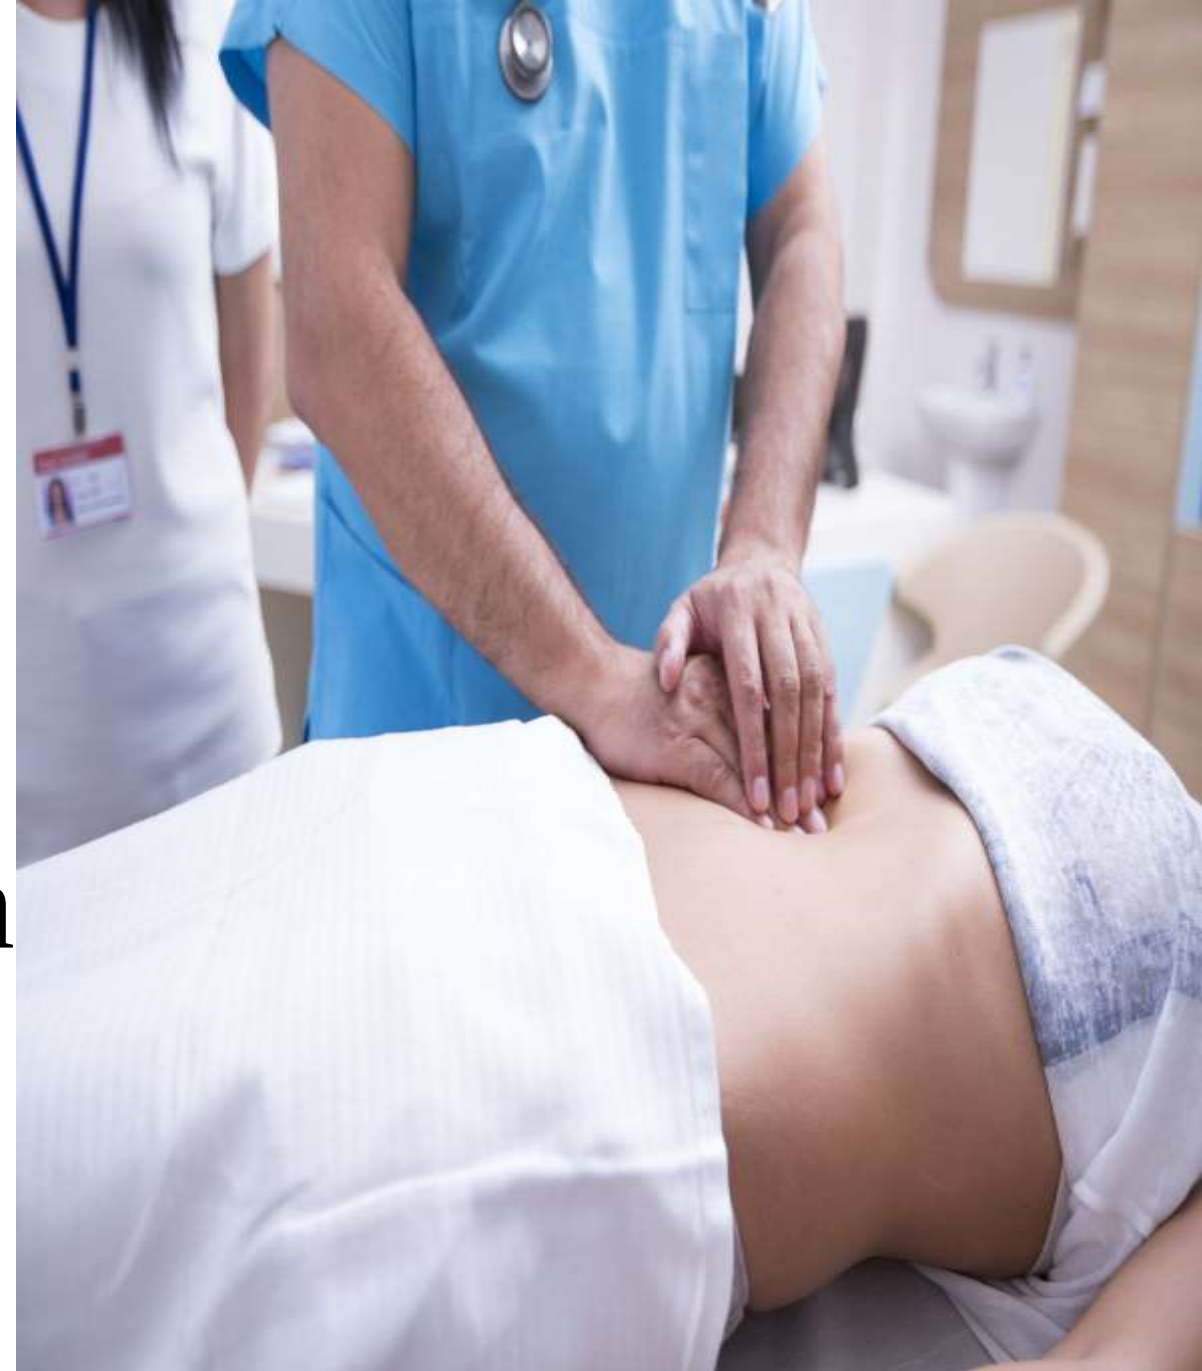

- Eyes are used to observe.
- Checking for skin color.

*Palpation*

touch

- ❖ Hands are used to feel for the texture, size, consistency, and location of body parts.
- ❖ Feeling for lumps

*Percussion*

hearing

- The fist or fingertips are used to tap the body part to determine the size, borders, and consistency of body organs.
- Checking for colon distention

# *Auscultation*

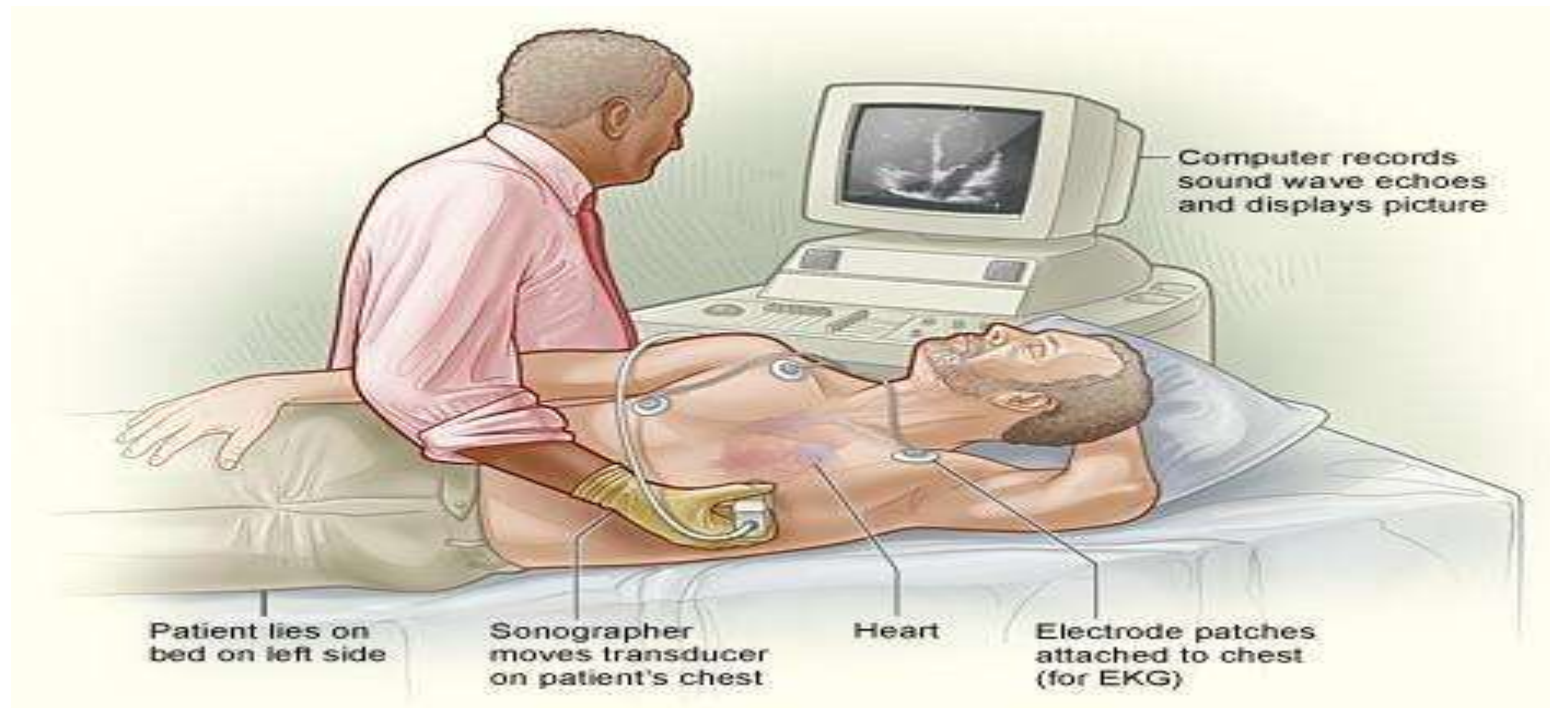

hearing

- A stethoscope is used to listen sounds within the body.
- Listening for breath sounds

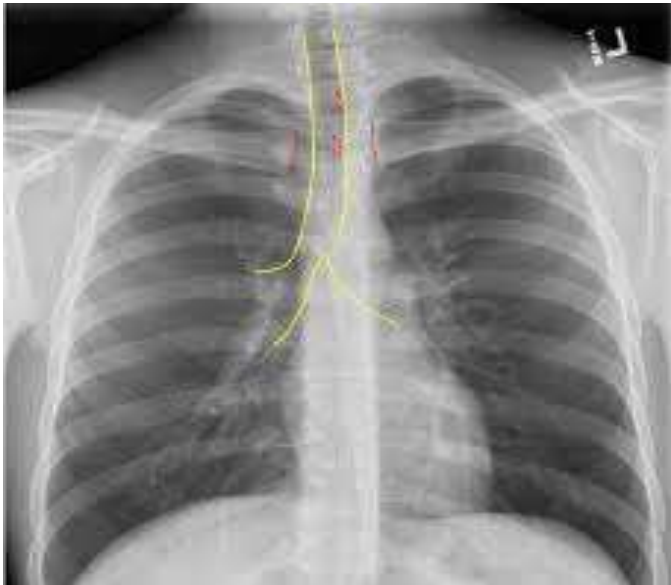

# COMMON DIAGNOSTIC TESTS AND PROCEDURES

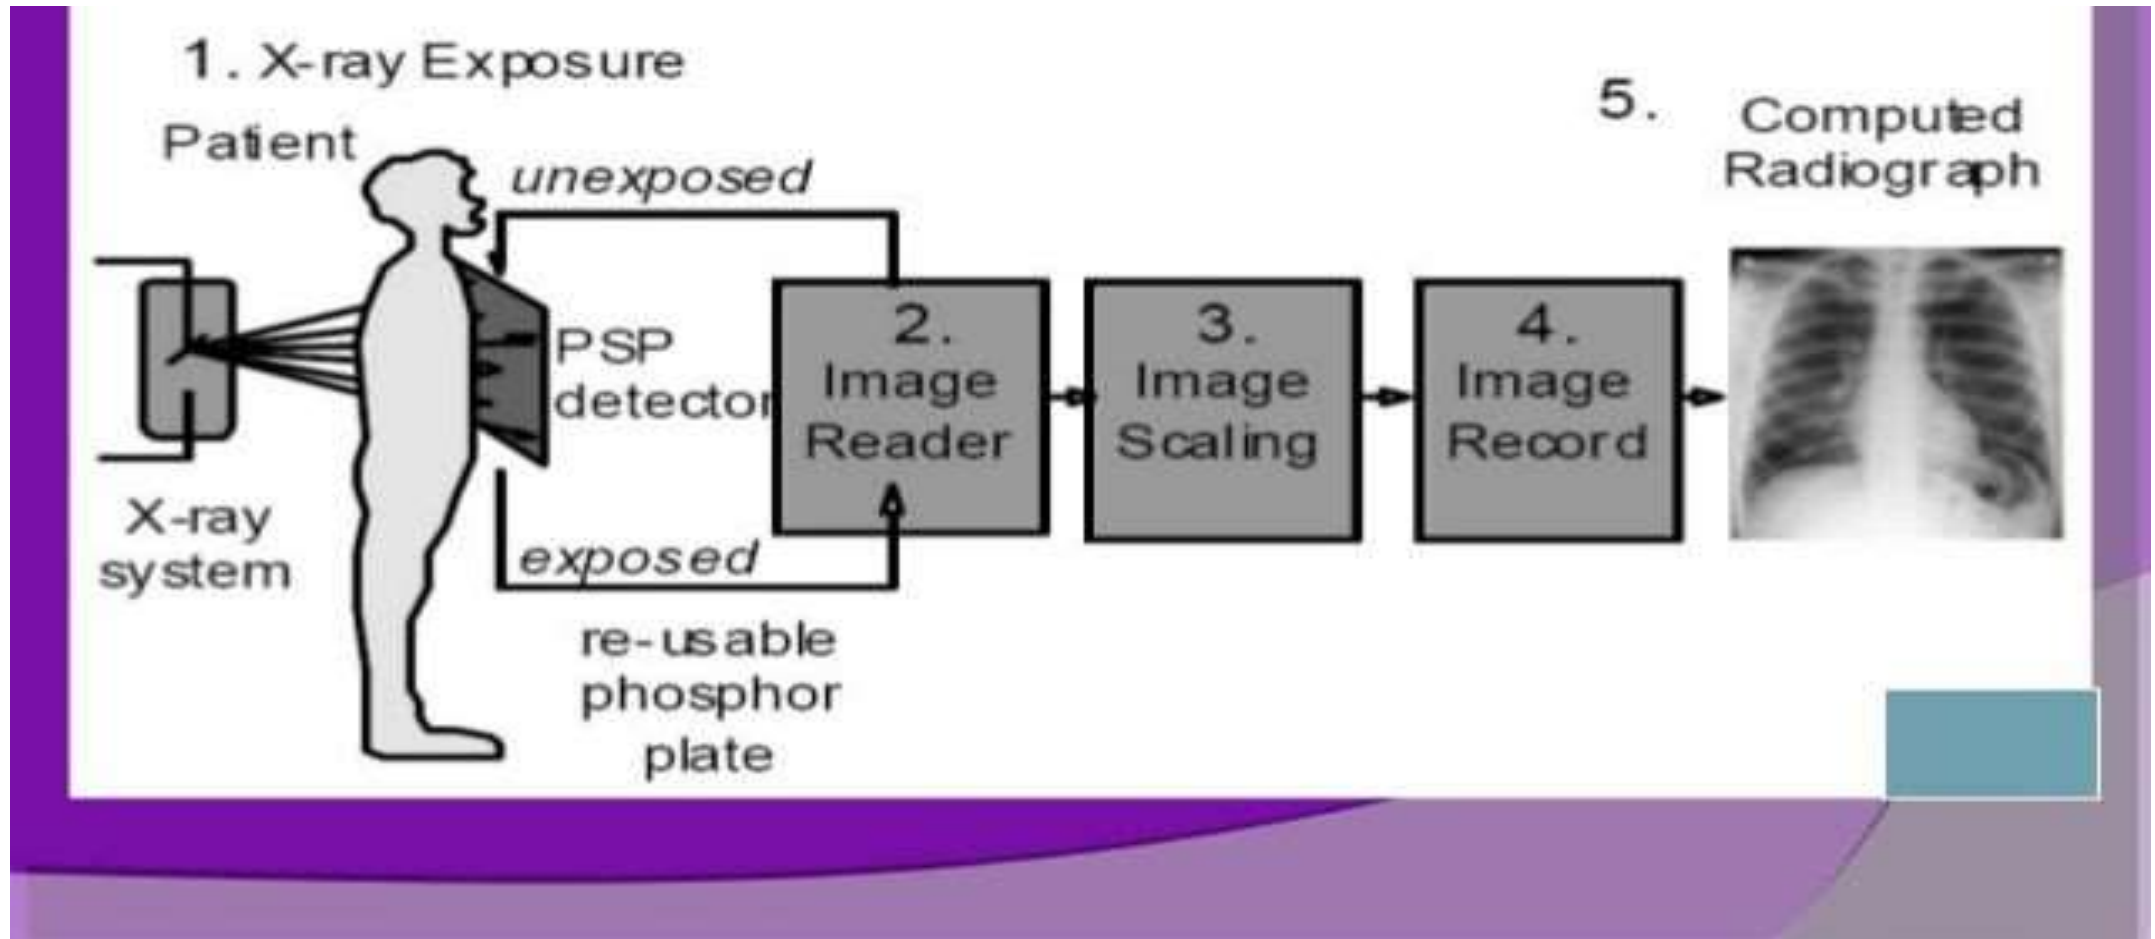

- -gram a record Echocardiogram

# graph instrument for recording Radiograph

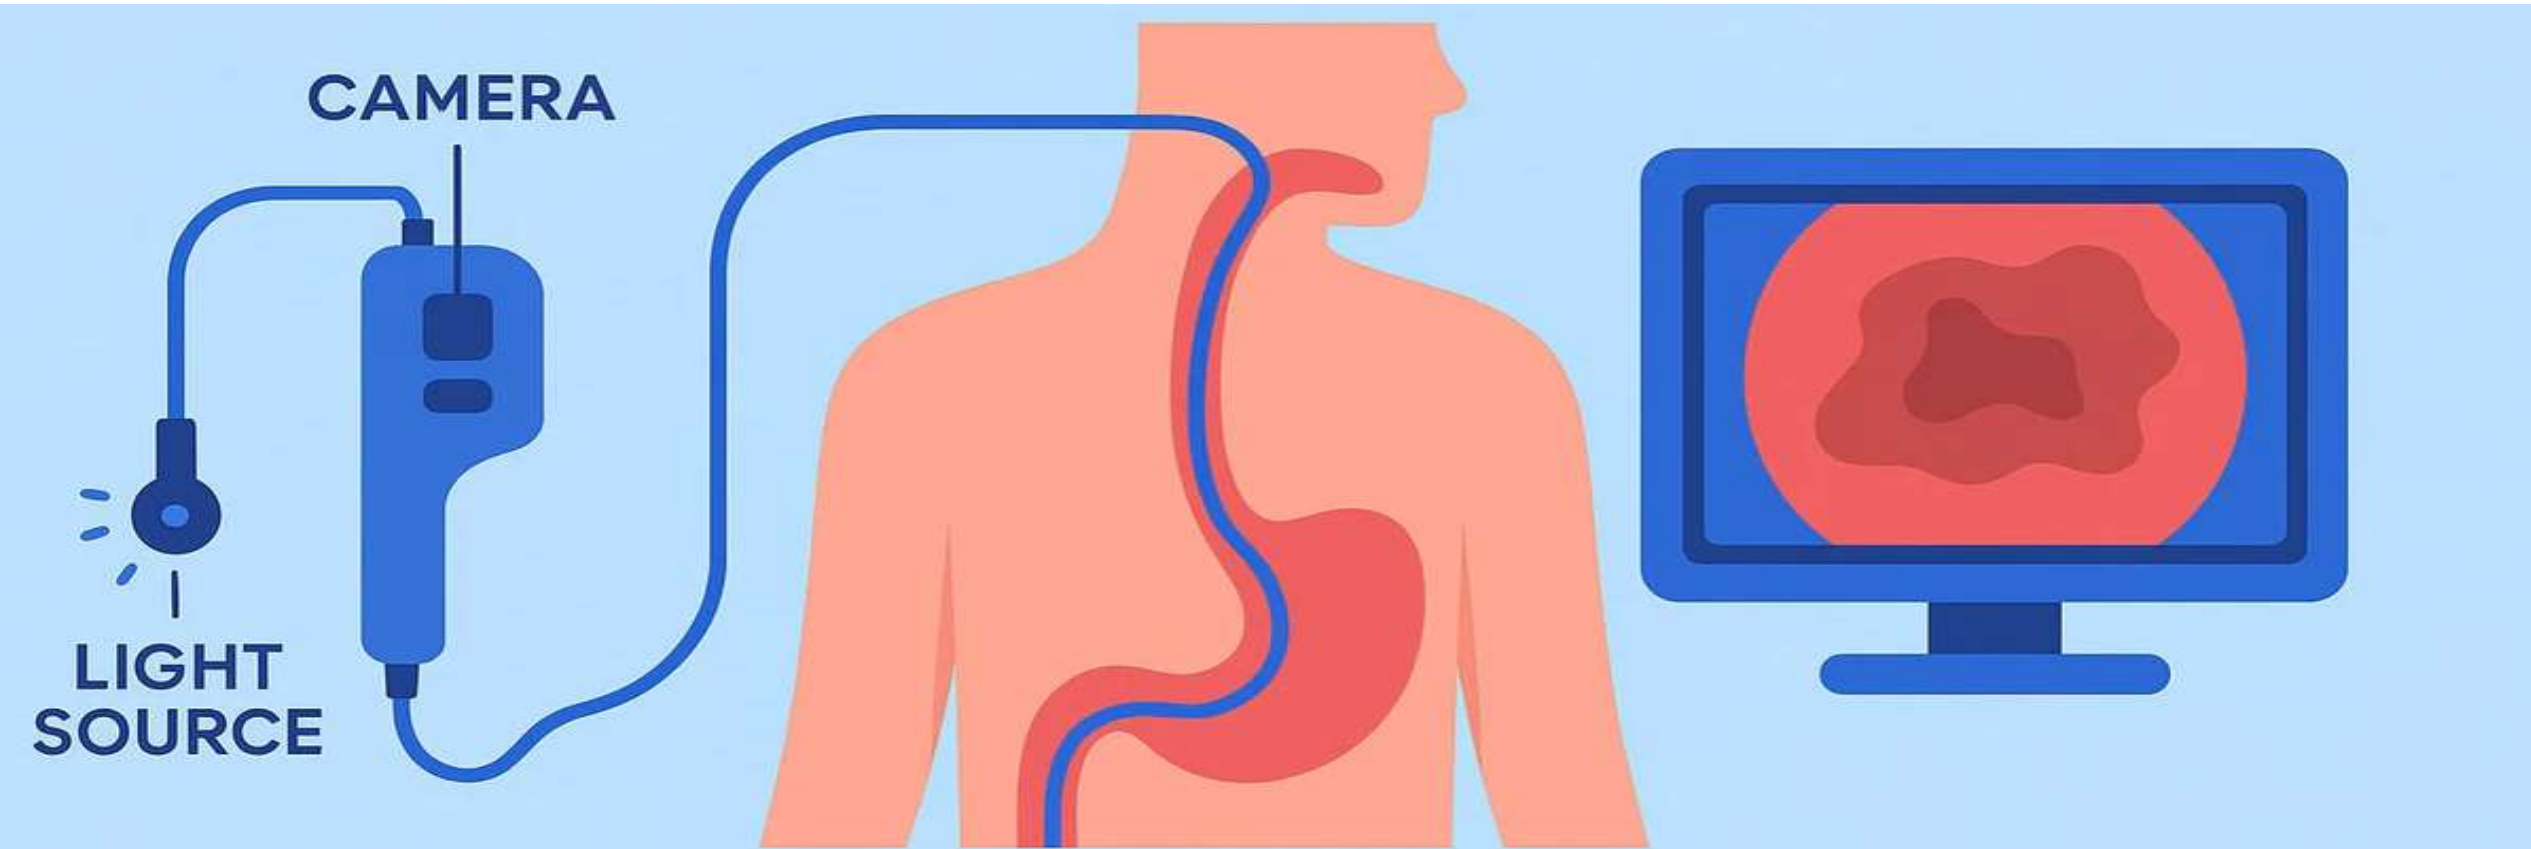

# -graphy      process of recording      Radiography

# Endoscopy:

(endo = inside + scopy = visual examination using a lighted instrument). It makes use of an endoscope (endo + scope) to view the internal body cavities or organs.

# Catheters & Cannulas

are instruments inserted into a body cavity, for withdraw &/or installation of fluids.
