

Q1: Choose the correct answer A, B, C or D: Δ

(5 Marks/ 0.5 for each)

1. Rank the following terms from the simplest to the most complex.

- a) Organelles, cells, tissues, organs, organism
- b) Cells, organelles, organs, tissues, organism
- c) Tissues, cells, organelles, organs, organism
- d) Organs, cells, organelles, tissues, organism

2. Which organelles modify, sort and package proteins in the cell?

- a) Mitochondria b) Ribosomes c) Golgi complex d) Lysosomes

3. The entrance of liquid materials across the cell membrane is called.....

- a) Phagocytosis b) Pinocytosis c) Exocytosis d) Plasmolysis

4. are cube-like cells with large, spherical central nuclei.

- a) Psedostratified columnar epithelium. b) columnar epithelium.
- c) Cubodial epithelium d) squamous epithelium.

5. The nucleus is enclosed in a double membrane known as.....

- a) Sarcoplasm b) Nuclear envelope c) Cell membrane d) Nucleoplasm.

6. Which membranous organelles are concerned with synthesis of lipids?

- a) Golgi apparatus b) Nucleus
- c) Smooth Endoplasmic Reticulum d) Rough Endoplasmic Reticulum

7. The epithelial tissue which present in the wall of blood vessels.....

- a) Simple cubodial epithelium. b) stratified squamous epithelium
- c) Simple squamous epithelium. d) Transitional epithelium.

8. All of the fallowing are membranous organelles except.....

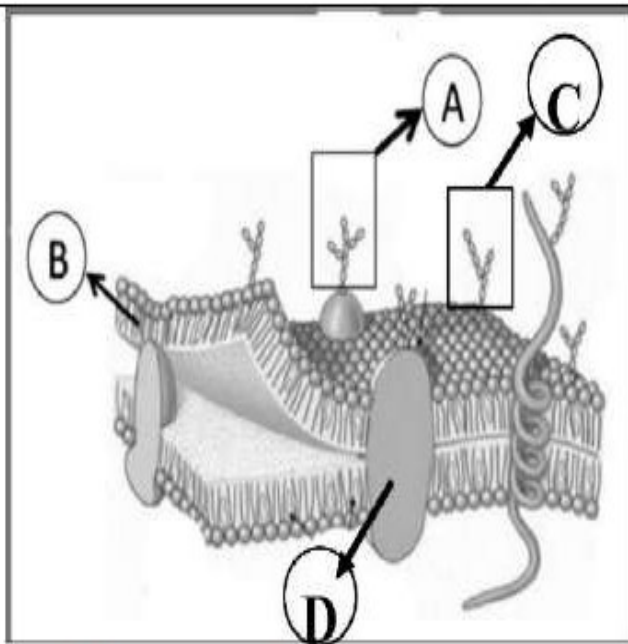

- a) Mitochondria b) Endoplasmic reticulum
- c) Golgi complex d) Cilia.

9. Thelie on either side of the membrane but are not bound to its hydrophobic interior.

- a) Integral protein. b) Peripheral protein.
- c) Cholesterol. d) Carbohydrates.
- b) Connective Tissue Proper. d) Epithelial tissue.

10. The epithelial tissue which is present in the skin.....

Q2: Complete the following (2.5 Marks): Δ

Identify:.....

Lable A:....., Lable B:.....

Lable C:....., Lable D:.....

A+C=....., Function in:

.....

Q3: Choose the appropriate description or function (from Table II) for each structure in the Table I (2.5 marks) ■:

Table I:

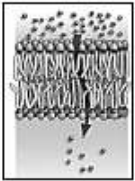

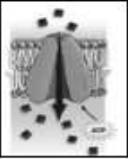

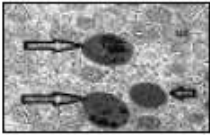

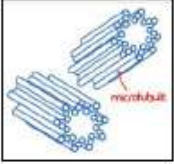

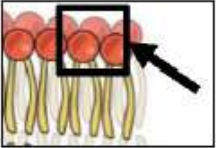

(1)  (.....)	(2)  (.....)	(3)  (.....)	(4)  (.....)
(6)  (.....)	(7)  (.....)	(8)  (.....)	(9)  (.....)

Table II:

A) Play an important role during cell division.
(B) The hydrophilic head of the phospholipid molecule.
(C) Heterogeneous rounded bodies with digested elements.
(D) It coordinates the cell's activities: growth, metabolism, protein synthesis and cell division.
(E) Responsible for cell respiration.
(F) It formed of communicating flat tubules (cisternae) with rough surfaces.
(G) The movement of small, uncharged molecules (like: O ₂ and CO ₂) through the lipid bilayer.
(H) Transport of molecules from low to high concentration (need ATP).
(I) Non-membranous organelles known as power-house of the cell.
(M) The hydrophilic tail of the phospholipid molecule.
(N) responsible for lipid, carbohydrate and mineral metabolism.

With my best wishes

Dr. Asmaa Ramadan
